About the Kitchen Remodel

After speaking with the Park Manager this morning it was made very clear that that there is no reason for alarm and that clubhouse 1 continues to be open and is perfectly safe to use. This is just a simple isolated area of mold that professionals have already been contracted to remove and or remediate. The manager is continuing to oversee this project. If anyone has any concerns please contact the management office directly at 863-293-3277.
